Mr. Mark Metcalf  
Ohio Environmental Protection Agency  
401 East Fifth Street  
Dayton, Ohio 45202-2911

Dear Mr. Metcalf:

**CLOSURE PLAN INFORMATION AND DATA SUBMITTAL FOR HAZARDOUS WASTE MANAGEMENT UNIT #54 KNOWN AS TANK T-2 (THORIUM NITRATE TANK)**

This letter is to advise you that a Closure Plan Information and Data (CPID) package for the above referenced Hazardous Waste Management Unit (HWMU) will be submitted to your office on or before November 15, 1995. The CPID package will be prepared as a stand alone document; however, as previously discussed with your office, it is considered an amendment to the Bulk Storage Tanks T-5 and T-6 CPID package. This is because certification of closure for tanks T-5 and T-6 is contingent upon achieving clean closure of Tank T-2, since all three tanks are located within the same secondary containment unit.

The submittal date of November 15, 1995, has been selected based on the complexity of the processes and remediation planning involved with closing this HWMU. Bench scale testing is planned during the second quarter of Fiscal Year (FY) 1995 to identify the best treatment option, or combination of options, for the thorium nitrate waste.

If you have questions regarding this matter, please contact John Sattler at (513) 648-3145.

Sincerely,

  
Jack R. Craig  
Director
